

Corona Aid – Investment Premium

What is funded

The investment premium is a subsidy for an investment and is paid out in cash. The amount is generally 7% and 14% for investments in the areas of digitization, greening and health / life science.

Investments in undeveloped land, financial assets, corporate takeovers and climate-damaging investments are not funded.

Investment period

Investments are funded that are made between August 1st, 2020 and February 28th, 2021 and are put into operation by February 28th, 2022 at the latest, for investments over EUR 20 million by February 28th, 2024 at the latest.

The premium can then be applied for between September 1, 2020 and February 28, 2021.

Funded investment volume

The investment must be at least EUR 5,000, the maximum funding is EUR 50 million per group.

Tax treatment

The investment premium is tax-free and does not reduce the taxable acquisition costs.

Application / procedure

The processing is carried out by the Austrian Business Service Agency (AWS / Austria Wirtschaftsservice GmbH). In principle, there is no legal entitlement to the payment of the subsidy applied for, however, this must not be refused for no reason.

A statement of the investment must be submitted to AWS no later than 3 months after the investment has been commissioned. From a grant amount of EUR 12,000, this statement must be checked and confirmed by a tax representative
